RMR E-News May 8, 2017

Hello RMR Faithful!

The weather has given us a break and we have most of the ground turned and we will start seeding in the next few days...weather permitting. (We got some awesome snow last weekend, and we are supposed to get rain most of this week, too....my prayer request that you are helping me with is working!!)

It is fun to see all of the pheasants and chukar in the fields, hopefully with little ones on the way! We should have a good hatch, if the hail doesn't hit us this season.

YOU GET 2 FREE HUNTS!! When you renew your membership at RMR you get two FREE hunts...but only if you renew on time. The MAY RENEWAL period is going now, and ends on May 31. If you are a May renewal member, you got a membership packet in the mail and it is due on or before the end of May--if you want the two FREE hunts! Don't miss out on the free hunts for renewing on time! If you are wondering if you are a May renewal or lost your packet call us in the office and we will help you 719-635-3257

COMMENT ON BURNING COFFEE GROUNDS FOR MOSQUITO REPELLENT: RMR Member Dr Skip Brod, Veterinarian, reminds us that coffee grounds are toxic to dogs. If you are burning the grounds, keep them away from the dogs and remember that when you put the grounds in your trash, too!

COME SHOOT SOME TARGETS

The ranges are open and we are on summer hours, as you know. Tuesday through Saturday. Let us know you are coming so we can have someone to meet you at the clubhouse. We are going in nine directions at the moment, so a phone call is appreciated to let us know when you will be coming to shoot. 719-635-3257

RMR MEMBER NEWS

Jim Dirker is recovering from his second knee replacement. I keep thinking he doesn't have any more things to replace! Prayers for a speedy recovery!!

Al Vaske is still among us, following a serious heart issue that resulted in major surgery. We are praying for a full recovery, Al...keep us in the loop.

Mike Morgan went through stem cell replacement for his cancer and he just got his 30 day notice and he is **CANCER FREE!** He wants to thank everyone who has been praying for him and he looks forward to seeing you this summer training dogs!

Do you know anyone that would like to get the RMR E-News on a regular basis?

You will get more of the witty and informative notes now that the season is starting. We will keep you up to date on things at the club and industry related around the state and country.

TICKS-- UPDATE: Prevention & Treatment

From Dr Steve Bodman, MD

Besides the prevention you mention, you have to be aware of the problems that ticks can cause, if imbedded: for instance tick fever and Lyme Disease.

Wearing light clothing helps to spot ticks so they can be brushed off. Tuck pant into socks to prevent ticks from getting on your legs. Spray clothing with pyrethrin spray(REI, Target) and let dry before wearing. DEET will discourage/kill ticks, but is toxic if a lot is used. Check yourself carefully when you have been afield. If a tick is embedded use a tick removal tool. I like the small tools that have an angled edge with a v-shaped slit that can be slid under the tick to gently extract it(Amazon,Pro Tick Remedy, \$5.99) Do not try to burn, apply chemicals or squeeze an engorged tick, because that may cause it to inject more bacteria. When the tick is removed, save it in a baggie with a moistened cotton ball; it can be sent off for identification and whether it contains harmful bacteria, like the Lyme organism. Any questions, give me a call. Steve Bodman cell: 719-331-3252

From Dr Jeff Fowler, Veterinarian

Brett, I have had good luck with Adams Flea and Tick mist on myself and my dogs, and this is over the counter and some Vets carry it. There are a lot of good things for pets for flea and tick, but most are not for humans, but Adams is. Started using it after my mother got Colorado tick fever at our Tarryall place where ticks at times are a plague. It is cheap, mild and quite effective. I spray it on the dogs all over as well as a heavy dose on pant legs when hiking in tick country. I have even used it on bare human legs w/o consequence. This is extra label use though so lawyers and whiners should not try it. No attached ticks since we began doing this regularly.

Accountant: "Doctor, I just can't get to sleep at night."

Doctor: "Have you tried counting sheep?"

Accountant: "Yes, and that's the problem! I make a mistake and then spend three hours trying to find it!"

The teacher was giving her class of seven-year-olds a nature history lesson.

"Worker ants," she told them, "can carry pieces of food five times their own weight. What do you conclude from that?"

One child was ready with the answer, "They don't have a union?"

I heard that Labradors are the worst for 'gas'! Can you attest or is your breed worse?

I know it has to depend on what they eat, but our Labs can clear a room sometimes!

Have a Clear Air Week!!
